

Question ID	Feedback question	Purpose	Bulgarian version	Notes for use
FQ1	Is the framework understandable?	To check whether the framework is clear enough for a practitioner to read and use	Разбираема ли е рамката?	Ask whether the questions and wording make practical sense
FQ2	At what project stage could it be used?	To identify whether the framework belongs in concept design, technical design, specification, procurement or maintenance planning	На какъв етап от проекта може реално да се използва?	This helps position the framework in architectural practice
FQ3	Which question is unrealistic or difficult to answer?	To identify questions that may require information architects do not usually have	Има ли въпрос, който изглежда нереалистичен или труден за отговор?	This tests practical usability
FQ4	What information would an architect actually have?	To understand the realistic evidence available during design and specification	Каква информация архитектът реално би имал на този етап?	This prevents the framework from requiring impossible data
FQ5	What is missing?	To identify practical gaps in the framework	Какво липсва?	This may lead to an additional note, clarification or limitation
FQ6	Does it distinguish rebound risks from ordinary implementation problems?	To check whether the classification logic is understandable	Успява ли рамката да различи rebound рискове от обикновени практически проблеми при изпълнението?	This directly tests the central classification purpose of the framework
